Foot & Ankle Specialist

Technology for Balance & Motion

Balance, stability, performance & Function of our skeletal system in the form of activity and movement counts on the feet act. 26 bones hundreds of muscles and ligaments, thousands of nerve-ends, most complicated mechanical work in the body, millions of actions (contractions, extensions, rotations, nerve-reactions, etc.) are happening down in that small part of our body, working silent, imprisoned in couple of boxes.

BIOFOOT® is an innovated Foot healthcare company with 18 years of experience in foot and lower extremities health, started in Jordan and now has extended activities in UAE, Saudi Arabia, Qatar and Oman. And very soon BIOFOOT® will cover the whole Middle East region.

We believe that good posture and correct motion patterns starts from foot. That's why we originate the highest-technology full solutions for foot and posture wellbeing through our topmost products.

Because BIOFOOT® found by Foot and physical healthcare specialists who believe in scientific methods, we have set the technical terms as our highest priority to deliver the highest level of products by sponsoring and participating in several scientific researches and studies in the past few years. And still, BIOFOOT® is providing so many social and community educational activities aiming to improve awareness and knowledge about mechanical foot health in the whole Middle East area.

Our Vision

- Increase foot health awareness.
- Facilitate latest foot health methods and high technology equipment for each person. Especially for the orthopedic cases and Diabetic foot.
- Establish a foot health database in Middle East area.
- Finding scientific platform for foot and lower extremities disorders by support researches and studies.
- Engaging with foot health activities, whether with healthcare providers or with physical health specialists through workshops, training sessions and lectures.
- Improving our database and communication with community.
- Making high quality and latest foot health technology available and yet affordable.
